BRITISH CHANNEL,
T OF THE ATLANTIC OCEAN,
THE COAST OF IRELAND;

OMAS JEFFERYS, Geographer to the King.

s Improvements and Emendations to the Year 1788.

Fathoms. — The Roman Figures indicate
Stream setting to the Eastward on the Nor
thing, or Northing is added to the Number from
m will shew you how long the Tide is to run
and 12 you must Substract 12 therefrom.

d by LAURIE & WHITTLE,
As the Act directs.

The Parts shew the Direction of the Currents produced by the Tides as upon what Point of the Compass the Tide sets. A Northerly or Southerly Wind will alter that Dir.n but a little
The Variation of the Needle has been Westerly in the Channel since 1657. It is now above 23 D.
and a ¾ It has been found that if you allow one Degree of Variation for every 5 Years
you will always have the Variation in the Channel pretty exact.

No 53, Fleet Street, London.

INDEX of the SOUNDINGS.

I SOUND. Latitude 18°.23.30 Longitude 11°.10.0

92 — Fine Gray Sand, prick'd with Black.
100 — Fine Gray Sand, mixt with small Shells, and broken Bits.
110 — Gray Sand, mixt with Bits of Brown Shells.
108 — Gray Sand, mixt with Bits of Shells, and Brown Gravel.
117 — Gray Sand, mixt with Bits of Shells, and Gravel.
104 — Gray Sand, mixt with Shells, and Gravel.
110 — Gray Sand, mixt with small Cornet Shells.
108 — Sand, mixt with Gravel, Shells, and small Cornets.
108 — Whitish Gray Sand mixt with Stones as big as Beans & others as flat brown & Whitish.
100 — Sand of a Whitish Gray, mixt with Bits of Shells, and Fine Cornets.
98 — Coarse Sand, mixt with Bits of Cockle Shells.
90 — Whitish Gray Sand, mixt with Bits of Shells, & some brown & Yellowish small Stones.
84 — Whitish Gray Sand mixt with Barley Beards.
80 — Whitish Gray Fine Sand, mixt with Bits of thin Shells & Fine Cornets.
70 — Whitish Gray Sand, mixt with Barley Beards, and Fine small Shells.
75 — Fine Gray Sand, mixt with Bits of Shells.
75 — Whitish Gray Sand, spotted with Red and mixt with Bits of Shells.
70 — Whitish Coarse Shining Sand, mixt with Fine Shells.
65 — Whitish Coarse Shining Sand, mixt with Barley Beards, and Grals.
94 — Whitish Coarse Sand.

II SOUND. Latitude 18°.12.40 Longitude 9°.32.40

108 — Whitish Gray Sand, prick'd with Black, and Cockle Shells.
100 — Gray Sand, mixt with Ground Shells.
105 — Gray Sand, mixt with Cornets, Gravel, and Shells.
105 — Sand, mixt with Yellow and Bits of Shells.
103 — Sand, mixt with Bits of Shells, small Stones, and Gravel.
77 — Gray Sand, mixt with Bits of Shells, and small Stones.
90 — Gray Sand, mixt with Bits of Shells, Cornets, and Coral.
85 — Gray Sand, mixt with Bits of Shells, of various colours.
80 — Gray Sand, mixt with Bits of Shells.

III SOUND. Latitude 17°.17.0 Longitude 9°.19.20

108 — V[illegible] Fine Gray Sand, mixt with small Fine Shells.
105 — Coarse Sand, mixt with Bits of Shells & with small Black & Brown Stones.
100 — Ground Shells, mixt with Gravel and Shells like Barley Straw.
92 — Ground Shells, mixt with very fine small Shells & small Stones & a little Barley Straw.
80 — Sand, mixt with small Stones, like Coarse Gravel, and white small Shells.
80 — Sand, mixt with Bits of Fine Shells and Barley Straw.
76 — Bottom like Bran, mixt with very Fine Cornets.
72 — Bottom like Bran, mixt with Shells and Cornets.
70 — Sand, mixt with Bits of Fine Shells and Onion Peels.
52 — Whitish Gray Sand, mixt with Barley Beards.
56 — Coarse Sand, mixt with Fine Shells.
44 — Fine Gray Sand, at 14 Leag. North & Black Stones.

IV SOUND. Latitude 17°.41.50 Longitude 9°.1.50

105 — Sand, mixt with Bits of Shells, and Gravel of divers colours.
110 — Fine Sand, mixt with Bits of Shells.
115 — Sand, mixt with Bits of Fine Shells.
110 — Gray Sand, mixt with Bits of Fine Shells.
88 — Gray Sand, mixt with Gravel.
82 — Gray Sand, mixt with Gravel.
65 — Gray Sand, prick'd with Black.
44 — Rocky Ground.
85 — Gray Sand, mixt with Bits of various colours.
77 — Gray Sand, prick'd with Black.
51 — Fine Sand, prick'd with Black.

V SOUND. Latitude 17°.25.50 Longitude 7°.53.0

100 — Coarse Sand, of a Whitish Gray, mixt with Ground Shells & small white ones.
96 — Coarse Sand, of a Whitish Gray, mixt with small Shells.
99 — Coarse Sand, of a Whitish Gray, mixt with Bits of Shells.
88 — Whitish Gray Sand, mixt with Bits of Shells, and Fine Cornets.
85 — Gray Sand, mixt with Fine Shells.
80 — Gray Sand, mixt with Fine Shells.
75 — Coarse Bottom, mixt with muddy Sand.
68 — Brown Mud.
61 — Soft and Yellowish Mud.
70 — Brown Sand, a little muddy.
76 — Gray Sand, prick'd with Black.
50 — Brown Mud.
38 — Gravel, Coral and Shells.

VI SOUND. Latitude 17°.20.0 Longitude 7°.31.0

107 — Ground Shells, mixt with very Fine small Shells.
95 — Very Fine Brown Sand, mixt with Bits of Shells & small Flat Stones.
90 — Coarse Sand, spotted with Yellow, mixt with Bits of Shells & Long Shaded Cornets.
88 — Coarse Sand, spotted with Yellow, mixt with Bits of Shells & Cornets.
85 — Fine Sand a little Yellowish.
85 — Slate colour Sand, mixt with very Fine Shells & small Flat Stones of various colours.
77 — Fine Yellowish Sand, mixt with Bits of Shells.
75 — Fine Yellowish Sand with white Spots.
75 — Fine Sand, a little Yellowish.
65 — Fine Sand a little Yellowish.
43 — Bottom of Gravel, and Coral.
70 — Soft mud.
58 — Soft mud.
23 — Pebbles of divers colours.

Continuation of the VI SOUND, to begin at Point A.

73 — Fine Gray Sand, a little Slaty, and Fine Shells.
70 — Small Gravel, mixt with Stones as big as Beans & with Bits of Fine Shells.
67 — Fine Sand, a little Yellowish.
60 — Fine muddy Sand.
65 — Coarse Sand, mixt with small Flat Stones, & with Bits of Shells.
58 — Muddy Bottom.
53 — Muddy Bottom.

VII SOUND. Latitude 17°.8.0 Longitude 7°.13.30

107 — Coarse Sand, mixt with Fine Yellowish Cornets.
92 — Gray Sand, mixt with Fine Yellowish Cornets.
87 — Gray Sand, mixt with Fine Cornets.
87 — Gray Sand, mixt with Fine Cornets.
82 — Gravel, and Shells.
70 — Coarse Brown Sand.

VIII SOUND. Latitude 16°.57.18 Longitude 7°.2.40

85 — Fine Brown Sand, mixt with Bits of Shells, and Coral.
86 — Fine Brown Sand, a little muddy.
80 — Fine Gravish Sand.
80 — Fine Sand, mixt with Bits of Shining Shells.
75 — Fine but muddy Sand.
72 — Fine Brown Sand, mixt with Bits of Fine Shells.
70 — Fine Yellowish Sand, prick'd with Black.
61 — Brownish Gravel, mixt with Flat Stones.
47 — Coarse Sand and Gravel, mixt with small Stones.
45 — Gravel.
45 — Brown Gravel, mixt with Bits of Shells.

IX SOUND. Latitude 16°.54.0 Longitude 6°.35.0

90 — Gravel, mixt with small Brown Stones, and Fine Cornets.
82 — Fine Gray Sand, but a little muddy.
80 — Fine Sand, but a little muddy.
75 — Very Fine Sand, mixt with small Stones.
72 — Fine Gray Sand.
67 — Fine but muddy Sand, mixt with Bits of Shells.
60 — Coarse Sand, mixt with Stones as big as Beans.
40 — Fine Sand, mixt with Bits of Shells, and small Pebbles.
30 — Gravel.
20 — Sand, mixt with Gravel and Bits of Shells.
18 — Gray Sand.
15 — Rocky Bottom.

X SOUND. Latitude 16°.35.0 Longitude 6°.37.25

118 — Fine Sand, mixt with Fine Cornets.
90 — Fine Sand, mixt with Cornets.
88 — Fine Gray Sand, mixt with very small and Slender Cornets.
85 — Whitish Gray Sand.
80 — Bottom of Gravel and Shells.
78 — Fine Gray Sand, prick'd with Black.
73 — Fine Whitish Gray Sand.
68 — Fine Gray Sand, prick'd with Black.
60 — Bottom of Thin mud.
47 — Fine Brown Sand.
44 — Brown mud, mixt with Bits of Shells.
30 — Bottom of Gravel, mixt with Bits of Shells.

XI SOUND. Latitude 16°.25.0 Longitude 6°.8.0

90 — Whitish Sand, mixt w[illegible] Gray, and with small Stones of various colours.
86 — Small Gravish Gravel.
83 — Gravel, mixt with small Stones.
78 — Small Reddish Gravel.
73 — Fine Gray Sand, mixt with a little mud.
68 — Fine Sand, mixt with a little mud.
55 — Fine Gray Sand.
18 — Fine Sand, but a little muddy.
40 — Reddish Sand, mixt with Gravel and small Stones.
20 — Gray Sand, prick'd with Black.
24 — Gray Sand, Prick'd with Black.
18 — Gray Sand, prick'd with Black.

XII SOUND. Latitude 16°.5.0 Longitude 5°.13.15

90 — Brown Sand, mixt with Fine Cornets and Bits of Shells.
82 — Gray Sand, mixt with small Fine Cornets.
84 — Gravel, Fine Shells and Ground Shells.
78 — Gravel, mixt with small Stones.
70 — Very Fine Gray Sand.
68 — Fine Gray Sand, but a little muddy.
60 — Muddy Bottom.
38 — Bottom of Pebbles and Gravel.
39 — Coarse Gravel, mixt with small Stones.
30 — Flat Rocks and small Stones.
30 — Gray Sand, mixt with small Stones.
26 — Gray Sand a little prick'd with Black.
26 — Sand mixt with many Bits of Shells.
24 — Fine Gray Sand.
16 — Gray Sand.
15 — Fine Brown Gravel.

XIII SOUND. Latitude 15°.50.0 Longitude 5°.36.0

92 — Fine Brown Sand.
72 — Sand, mixt with Coarse Gravel, and Bits of Shells.
68 — Coarse Brown Sand, mixt with Bits of Shells.
66 — Fine Brown Sand.
50 — Yellowish Sand, prick'd with Black.
45 — Fine Gravel, spotted with Black.
37 — Very Fine Sand, mixt with Bits of Shells.
23 — Gravel, mixt with small Stones of Divers colours.
18 — Fine Sand, prick'd with Black.
78 — Fine Sand, mixt with Bits of Shells.
65 — Coarse Brown Sand.

Continuation of the XIII SOUND, to begin at Point B.

89 — Fine Gray Sand, mixt with Small Cornets.
80 — Fine Whitish Gray Sand.
78 — Coarse Brown Sand.
75 — Fine Brown Sand.
64 — Sand and Black Mud.
52 — Coarse Sand, spotted with Black.
40 — Coarse Sand of Divers colours, mixt with Bits of Shells the whole of a brown colour.
32 — Coarse Sand, mixt with Bits of Shells.
24 — Coarse Gravel.
18 — Rocky Bottom.

XIV SOUND. Latitude 15°.20.0 Longitude 5°.0.0

90 — Fine Brown Sand.
86 — Fine Brown Sand.
81 — Fine Brown Sand.
71 — Fine Sand, but a little muddy.
69 — Fine Brown Sand, mixt with Bits of Shells, and Fine Spiral Cornets.
64 — Coarse Brown Sand.
52 — Fine Brown Sand.
46 — Fine Sand, but a little muddy.
35 — Fine Brown Sand, but muddy.
26 — Gray Sand, a little prick'd with Black.
24 — Fine Brown Sand, but a little muddy.

Continuation of the XIV SOUND, to begin at Point C.

68 — Fine Gray Sand.
62 — Fine Gray Sand, but a little muddy.

AN ACCURATE CHART, OF THE BAY OF BISCAY,

with THE SOUNDINGS, taken in 1756, & 1757. BY THE FRENCH FRIGATE ANEMONE.
to know how far the Soundings, between Ushant and Bayonne, extend from Shore, & the Quality of the Bottom.

DONE BY ORDER OF THE MINISTER OF MARINE.
to facilitate the Approach of Ships to the Coast of France.
by the help of Soundings.

BY Mr. MAGIN ENGINEER TO THE MARINE.

The Numbers Linked by Dotted Lines, are the Soundings taken by the Kings Order: these Soundings express Fathoms, Five Feet Each.
The Little Circle under the Said Numbers in this manner ⊙ marks the True Point of Sounding.
The Little Circle dotted in this manner ○ marks the Places Sounded without finding Bottom, tho' with a Line of 200 Fathoms.
A Dotted Line Passes over all these Points, and it is called the Bottomless Line, because beyond that Line the Bottom is not found, except at a greater Depth.

As it is of importance to inform Mariners of the Quality of the Bottom of every Soundings, an Index has been added to the Chart, which contains a repetition of the Soundings, in the same order as they have been taken, and opposite to each Sounding is expressed the Quality of the Bottom found in that Part of the Sea, the use of that Index is as Follows.

Example.

Suppose you would know the Quality of the Bottom found at 92 Fathoms in the VII SOUNDING, you must Look for VII SOUND. in the Index and opposite to the Number 92 under that Title you'll Read — Gray Sand mixt with Yellowish Cornets, which is the Quality of the Bottom you desire to know.

LONDON.

Published 12th. May. 1794 by LAURIE & WHITTLE. No. 53 Fleet Street

UNIVERSITY OF CAMBRIDGE OCT 29 1921

40 — Coarse Sand of Divers colours, mixt w. Bits of Shells, the whole of a brown colour.
32 ..... Coarse Sand, mixt with Bits of Shells.
24 — Coarse Gravel ..... | 18 ... Rocky Bottom.

XIV SOUND. Latitude 45. 20. 0 Longitude 3°. 6'. 0.

90 ... Fine Brown Sand.
86 — Fine Brown Sand ..... | 81 ... Fine Brown Sand.
71 ... Fine Sand, but a little muddy.
69 — Fine Brown Sand, mixt with Bits of Shells, and Fine Spiral Cornets.
64 ... Coarse Brown Sand.
52 — Fine Brown Sand.
46 ... Fine Sand, but a little muddy.
35 — Fine Brown Sand, but muddy.
26 ... Gray Sand, a little pricked with Black.
21 — Fine Brown Sand, but a little muddy.

Continuation of the **XIV SOUND**, *to begin at Point C.*

68 ... Fine Gray Sand.
62 — Fine Gray Sand, but a little muddy.
49 ... Fine Brown Sand.
44 — Fine Brown Sand.
38 ... Coarse Sand, mixt with Small Olive coloured Stones.
33 — Gravel, mixt with Stones.
32 ... Gravel, mixt with Stones.

XV SOUND. Latitude 45°. 0'. 15 Longitude 1°. 35'. 15.

80 — Very Fine Yellowish Sand, pricked with Black.
75 ... Yellowish Sand, pricked with Black.
65 — Fine Grayish Sand.
55 ... Yellowish Sand, pricked with Black.
46 — Fine Brown Sand.
38 ... Yellowish Sand.
33 — Sand and Black mud.
22 ... Fine Gray Sand.

XVI SOUND. Latitude 44°. 52'. 0 Longitude 1°. 9'. 0.

85 — Fine Gray Sand, but a little muddy.
62 ... Fine Gray Sand, but a little muddy.
30 — Fine Yellowish Sand.

XVII SOUND. Latitude 44°. 43'. 50 Longitude 1°. 13'. 0.

110 ... Very Fine Grayish Sand.
80 — Very Fine Sand, but a little muddy.
59 ... Very Fine Sand, but a little muddy.
35 — Very Fine Brown Sand.

XVIII SOUND. Latitude 44°. 7'. 20 Longitude 1°. 11'. 5.

85 — Very Fine Sand, but a little muddy.
68 ... Very Fine Mud coloured Sand.

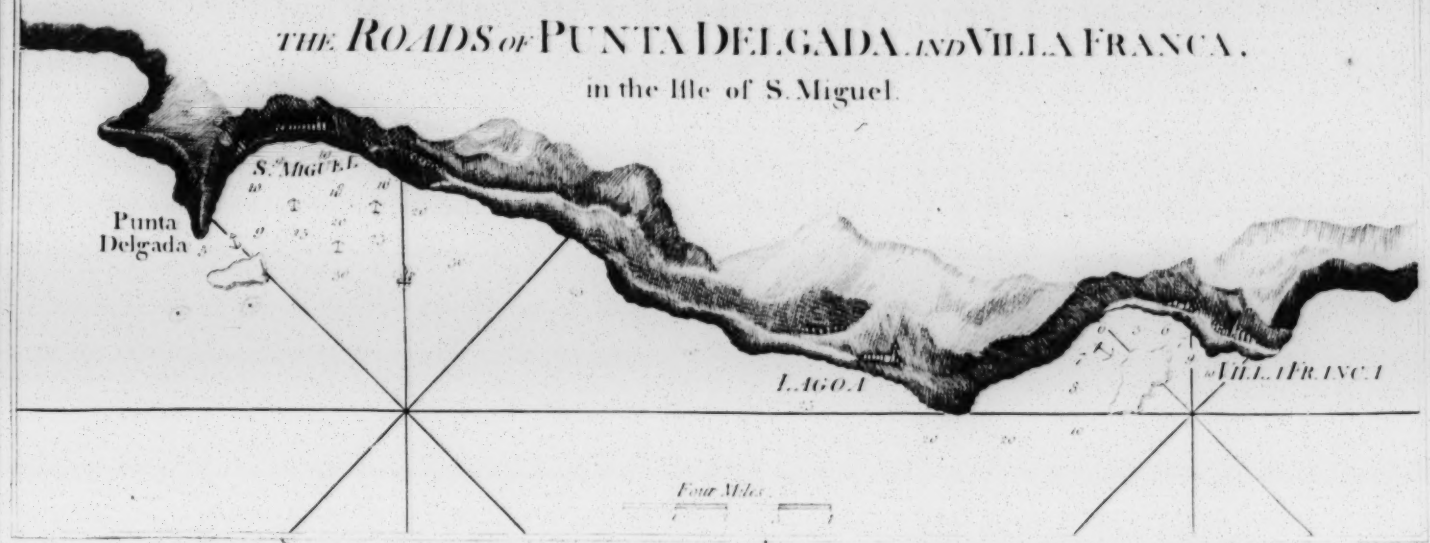
THE ROADS OF PUNTA DELGADA AND VILLA FRANCA,
in the Isle of S. Miguel.



Observation on THE FORMIGAS
by Capt.n Nath.l Simpson 1785

These Rocks have been so dreaded by Navigators that some have been so far out of their Course to avoid them as most assuredly will find them laid down as very dangerous and the channel between them and S.ta Maria called Little Passage as represented as not frequented by Shipping. Off the said Island of S.ta Maria I was becalmed in coming from America and being then within two leagues of the Formigas I hoisted my boat out in order to explore them. From the Ship towards the Rocks I kept Sounding the East End of S.ta Maria bearing from the Ship W. by S. distant one League. The Formigas as you approach them appear dread fully Breaking flying higher than a Ships mast head although a calm. The Sea runs from the Westward so had an opportunity of Landing on the East Side of the Rocks but could find no Soundings with 60 Fathom Line till within thirty yards of the Rocks. They Bear from the Island of S.ta Maria N.E. by N. distant about three Leagues extending from North to South about three quarters of a Mile. Close along Side of the Formigas is seven Fathom water. The Highest Rock is from the surface of the water about sixty feet perpendicular. We Sounded from the Rocks towards S.ta Maria but could find no bottom with 120 Fathom Line till within a quarter of a Mile from the Island which proves that through the Little Passage the Whole Navy of England might run a breast without the least danger.

at this + Place
a Volcano came out of the Sea
the 31st of December 1719 &
went to the bottom the 1st of November 1720
It had appeared already in 1638.
60 Fathoms water were found on the very Spot
which it Occupied.

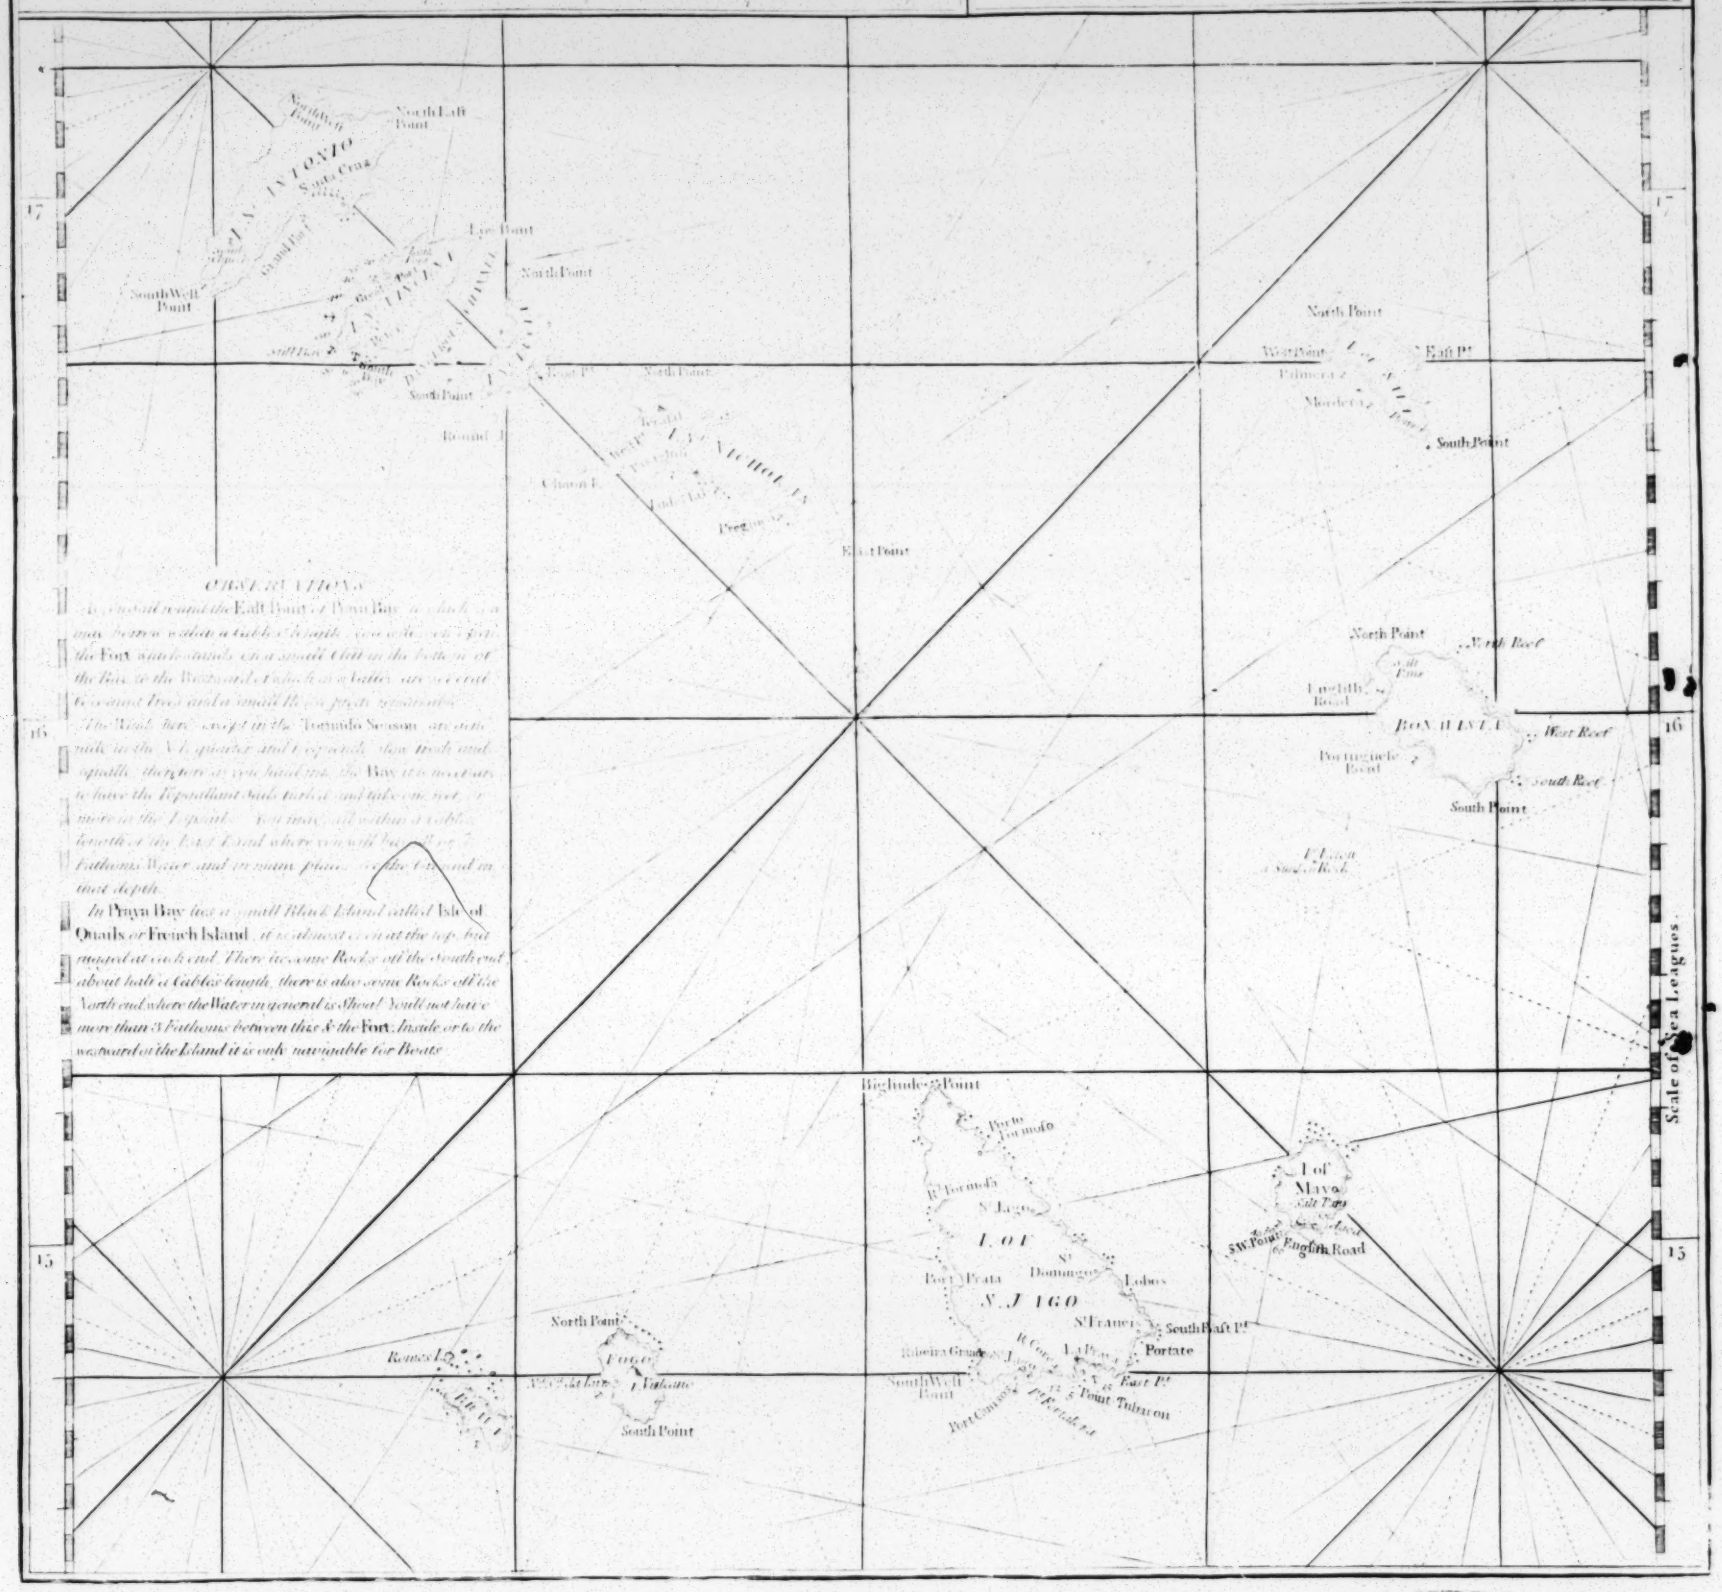
By Mons.r d'Apres de Mannevillette.
with several Additions

Published 1.st May 1794 by LAURIE & WHITTLE, *N.o 53 Fleet Street London*

A VIEW OF THE ENGLISH ROAD IN THE ISLAND OF MAYO.



CIRCUMSTANCES

As you sail round the East Point *of* Praya Bay *a black rock a mile from the shore resembles a table. You will see the* Fort *and the tents on a small Hill in the bottom of the Bay to the Westward, which is a little above the great Cocoa nut trees and a small Plain for landing.*

The Winds that accompany the Tornado Season are as in the rest of the Islands, variable from North and Southerly, they are very high and violent, they are also of short duration. The Bay is most safe to have the Dreadnought Sails bended and the Cable ready to unmoor in the Dispatch. You may ride within a Cables length of the East Land where you will have from 7 to 8 Fathoms Water and in many places of the Coast and in that depth.

In Praya Bay *lies a small Black Island called* Isle of Quails *or* French Island, *it is almost even at the top, but rugged at each end. There lie some Rocks off the South end about half a Cables length, there is also some Rocks off the North end where the Water in general is Shoal. You'll not have more than 3 Fathoms between this & the* Fort. *Inside or to the westward of the Island it is only navigable for Boats.*

Observations.

The Bermudas or Summers Iſlands so named from Juan Bermudas a Spaniard who first discovered them, and from Sr George Sumner one of their first English Settlers, lie in the Atlantic Ocean above 200 Leagues from Cape Hatteras in North Carolina, which is the nearest Land. Hurricanes and tempestuous weather are very frequent in thair Seas, and the American Navigaters call them the Horse Latitudes, because on account of the violent gales of Wind they meet in traversing them, they are frequently obliged to throw overboard the horses which they are carrying to the West-Indies Isls and to the Dutch Settlements at Surinam. Their Coasts are extremly dangerous being surrounded, chiefly on the North Side with innumerable Rocks most of which are always above water. The Channels into the Sounds or Harbours are so narrow and Shoals, that it is scarce possible for a Vessel to be carryed into them without the assistance of a good Pilot. What makes the Bermudas still more dangerous is the Current which sets to the N.E. from the Gulf of Florida, it is found to be very strong near these Islands insomuch that Vessels bound from the Southern and Northern Plantations, have been thereby unsensibly carried 40 or 50 Leagues to the Eastward of the Islands when the people were expecting in that Latitude to find themselves at as great a distance to the Westward. The Spanish Flotilla, coming in 1722 from Havanna to Old Spain was by that Current carried so far out of its true Course that had it not been for the Shifting of the Wind, which happend just when the Pilots saw the danger they were in, 45 Gallions must have been wrecked on the Western Coast of these Islands. The Variation of the Needle here is inconsiderable as well as the Tide which in common does not rise above five feet.

The Bermudian Settlers are about 10 000 They are a handsome well looking people humane, generous, & extremly kind & hospitable to the few Strangers who come amongst them. Their principal & most profitable employment is building of Sloops, & small brigantines, & shews of an excellent & most durable cedar wood, which they had once growing among them in great plenty, but from the great consumption is now on the decline. It is incorruptible & never touched by the Worms. Vessels built of it run for whole time perhaps 6 or 7 Years, without requiring the least repair not even calking. They are of a peculiar construction & all of them very fast Sailors. These Islands have quarries of a soft white Stone of which the Inhabitants carry cargoes to the Continent. They produce very fine Mulberry trees & abound in great variety of wild fowl. Plenty of the aquatic kind. Their Sounds & surrounding seas are well stored with fish, & Ambergrease is sometimes met with among their Rocks in lumps of considerable bigness.

32.m 31.d North Latit.

TURKS ISLANDS,

FROM A SURVEY

made in 1753, by the Sloops

l'Aigle *and* l'Emeraude,

BY ORDER

OF THE

FRENCH GOVERNOR OF HISPANIOLA,

with improvements from Observations

made in 1770, in the S^r. F. dward Hawke *Kings Schooner.*

One League or Three Miles.

21 d. 26 m. 42 s. Latitude of the South Point of the Grand Turk by Astronomical Observation

The Variation at Grand Turk in October 1770
was 6 d. 40 m. West.
The Tides Rise and Fall about 3 to 4 Feet A NNE Moon
makes High Water.
The currents are very uncertain.
The Autumnal Equinox is subject to North Winds and
Rain very variable; the Vernal Equinox the Contrary.
The Soundings are in Fathoms.

Observation

...never has lately proposed to the Court of Spain ... Communication between the Bay of Panama ... of Le between the Pacific and Atlantic Oceans / ... 7 or 8 Leagues in length, dug from Rio Grande ... Chagres, or from Rio del Caymito, to the Embarcadero ... which falls into Rio de Chagres. This very ingenious ... has been discountenanced by the Spanish Cabinet
